Flash Mail

Send/Receive E-mails Anytime, Anywhere

Features

Password Protection
- Password protection is available.
- If the password is incorrect, you can not enter Flash Mail.
- Password hint is available, which reminds you of the password.

Manage Multiple E-mail Accounts
- After the system setting is completed, you can manage multiple e-mail accounts. You can choose <Add New> or <Import>to add new accounts. If you select <Import>, the existing Outlook Express e-mail accounts will be imported.

Conveniently Send and Receive E-mails
- Includes the function of Receiving and Sending e-mails.
- Provides the function of Reply/Forward/Save/Save As.
- Assists in sending e-mail with backup and draft saving functions.
- Sends e-mail with attached files.
- Supports Traditional and Simplified Chinese, Japanese, Korean, English, and West Europe systems.

Fast & Easy Mail Browsing
- The mails can be arranged in order by sender, subject, date, or post location.
- It only downloads the basic information of every e-mail. User then can determine whether receiving the e-mail or not.
- "Select All", "Select Inverse" and "Delete Select" ... etc. can be used to brows the e-mails.
- Supports the HTML format.
- When deleting an e-mail, you can choose to delete the local copy only or delete the copy in the server as well.

Automatically Import/Export Outlook Address Book
- You can transfer address books from e-mail softwares, such as Outlook Express, to Flash Mail via CSV format.
